# To Our Customers

*This Catalogue cancels all previous Lists, Quotations or Prices*

## ORDERS

 ORDER early so that you may get the varieties and grades you prefer. All orders should be written on separate pieces of paper and not mixed with body of letter.

## QUANTITIES AND PRICES

The articles in the following list will be furnished at the annexed prices **ONLY** when the specified amount shall be taken. Fifty, however, will be furnished at the 100 rate and 5 at the 10 rate. In no case does this mean so many trees of assorted classes, but refers to **ONE CLASS** of assorted varieties; for instance, 5 apples, 5 pears or plums, and **NOT** to 2 apples, 2 pears and 1 plum.

## SUBSTITUTIONS

Where particular varieties are ordered, it should be stated whether and to what extent substitutions will be allowed in case the order cannot be filled to the letter. Lacking instructions, we reserve the right to send the next nearest grade if out of the size ordered. or to substitute varieties which are practically identical; labeling such substitutions correctly and indicating them on your invoice. We never substitute varieties and incorrectly label them, as is the common practice in some nurseries, and by irresponsible tree agents. We do not substitute on large orders without advising our customers.

## PACKING

All trees and plants are carefully labeled and securely packed in the best manner, for which a moderate charge, sufficient to cover cost of material, will be made.

## EXPRESS OR FREIGHT

Always state which way you want your order shipped and give explicit directions as to marking packages.

When it is left to us to choose the mode of conveyance, we will exercise our best judgment, but as all articles are at the risk of the purchaser after being shipped, we must not be held responsible for any loss or delay that may occur through the negligence of the transportation companies.

## GUARANTEE, ETC.

We warrant all trees and plants to be good, thrifty and true to label, but having no control over them after delivery to the transportation companies, or over the planting and care after they are received by the buyer, we will not be responsible in any other direction than as stated, and accordingly, if any tree or plant should prove untrue to kind, we will either replace same or refund the amount paid; but in no case will we be liable for any sum greater than the amount originally charged, and this statement is due notice to buyers of the extent of our responsibility for trees and plants after delivery and acceptance by the buyers.

## ERRORS AND SHORTAGES

Customers are requested to notify us at once of any errors or shortages so that we may rectify it at once. All claims must be made within one week after receipt of shipment, otherwise it will be assumed that the goods are satisfactory and in accordance with the invoice.

## REFERENCES

Orders from unknown correspondents must be accompanied by cash or satisfactory reference.

Address all communications to

PIONEER NURSERY, Monrovia, California.

# Hints on Transplanting Deciduous Trees

The situation of the orchard having been decided upon, the ground should be deeply plowed, subsoiled and thoroughly pulverized. The holes should be dug at least a foot larger in every direction than actually required by the roots when spread out in their natural position. Immediately before planting, be sure to examine the roots carefully, and cut away to a smooth surface all bruised, lacerated and broken roots and rootlets with a sharp knife. When the trees are received they should be immediately unpacked and the roots laid in a trench and well covered with soil, which should then be thoroughly wet down. If delayed in transit, thereby becoming dry and suffering from exposure—the bark showing signs of shrivelling—it is a good plan to immerse the trees in a tank over night, and the following day bury root and top completely in damp soil for a few days, until they become normal, and may be safely planted out. In planting the top soil should be broken down into the hole and worked carefully in between every root and fiber, filling up every crevice, that every root may be in contact with soil, and the whole made quite firm as the filling up progresses. The tree, when planted, may, in light soils, stand from two to three inches deeper than it did in the nursery; but in heavy clay or wet ground, it is advisable to have it stand at the same height as it was before transplanting. When the hole is nearly filled in, a pail of water should be thrown in to settle and wash in the soil around the roots. The earth should be packed very firmly around the roots as it is disastrous to allow the air to enter.

The ground should be kept loose and free from weeds. It is advantageous to spread around the tree for a distance of two or three feet each way a mulch of rough manure or litter, which conserves the moisture and prevents the ground from drying out and baking.

If the location is subject to high winds, plant with the largest branches towards the prevailing wind, and lean the tree slightly in that direction.

We advise pruning directly after planting. If strong winds prevail, prune with the upper bud pointing against the wind. Unbranched trees should be cut back to 18 to 30 inches if planted in orchard; for dooryard or other situations they may be left taller. Ordinarily about two-thirds of the top should be removed from all branched trees, but this must be done according to the best judgment of the operator, as no definite rule can be given, the object being to secure a well-balanced head. The leading shoot is usually cut back to make a good branching form. Unbranched figs, persimmons and walnuts are usually not pruned until the second year. Grapes should be trimmed to one stem and this cut back to 6 inches, except on extra large vines.

## TIME OF PLANTING

Deciduous trees and plants, berries and dormant stock of all kinds, may be planted at any time after the season's growth is completed and the wood has hardened. Plants should always be bare of leaves, except strawberries, and if the leaves have not dropped naturally, or have begun to start growth late in the Spring, they should be defoliated by hand. December is early enough to start planting, and as rains are usually late in Southern California, and a full selection of trees are not available until after January 1st, we strongly recommend January or February as the best months to plant deciduous trees. March planting is often successful, but the risk is greater. In April there is usually a large per cent. loss and May is decidedly too late, and we cannot entertain any claims for loss of deciduous trees purchased in April or May, but make a special discount for stock bought during those months. The above does not apply to plants or trees in balls or cans or to evergreen or citrus stock, which may be planted at any time, and we especially recommend the planting of balled citrus trees late in the season, and with proper attention to watering they may be planted with better success in August than in December or January. This also applies to palms and other tropical plants, and planting need not cease with the advent of warm weather, only the class set out should be changed. To insure success water often and abundantly the first season.

## DISTANCE FOR PLANTING

|                                      |                              |
|--------------------------------------|------------------------------|
| Standard Apples .....                | 25 to 30 feet apart each way |

| Distance. | 25 feet apart each way, number plants..... | 69            | 79                          |
| Distance. | 30 feet apart each way, number plants..... | 48            | 55                          |
| Distance. | 35 feet apart each way, number plants..... | 35            | 40                          |
| Distance. | 40 feet apart each way, number plants..... | 27            | 31                          |
| Distance. | 50 feet apart each way, number plants..... | 18            | 20                          |

**Rule—Square Method**—Multiply the distance in feet between the rows by the distance the plants are apart in the rows, and the product will be the number of square feet for each plant or hill, which, divided into the number of feet in an acre, (43,560) will give the number of plants or trees to the acre.

**Rule—Equilateral Triangle Method**—Divide the number required to the acre "square method" by the decimal .866. The result will be the number of plants required to the acre by this method.

## ABOUT WEIGHTS AND SHIPPING

The question of freight charges to distant points is a matter of serious consideration to such customers, and we are therefore submitting a few figures to give a clearer insight into the subject.

The general run of deciduous fruit trees, either in bales or cases, average about as follows: 6 to 8 ft., 2 pounds each; 4 to 6 ft., 1½ pounds each; 3 to 4 ft., 1 pound each; 2 to 3 ft., one-half of a pound each. Grape-vines, one-third of a pound each.

Deciduous ornamental trees from 6 to 8 ft. and up to 12 to 15 ft., 3 to 6 pounds each.

Potted plants in from 3- to 6-inch pots, packed in boxes, weigh from 4 to 12 pounds each.

Citrus trees, balled, packed in boxes, 40 pounds each, and with naked roots, 3 pounds each.

Palms, packed in boxes, with ball of earth, 2- to 3-ft. plants, 40 pounds, and gradually increasing to 110 pounds each on 5- to 6-ft. plants.

Grape cuttings 14 to 16 inches long, 80 pounds to the thousand cuttings, in either bales or boxes.

Eucalyptus, cypress, about 100 to the flat, 50 pounds per flat; hedge plants from 50 to 100 to the box, according to size, 50 pounds per flat.

Stock in cans, pints and quarts, 3 to 5 pounds each, gallon cans 6 to 14 pounds, 5 gallon cans 40 to 65 pounds, 8 to 10 gallon cans 75 to 125 pounds each.

## Deciduous

### APPLES.

Each 10 100

Write us for prices on large quantities. The apple market is liable to be rather unsettled this season, and we may be able to save you some money. We are now able to offer good trees for \$10.00 to \$14.00 per 100 on some standard varieties.

|                            |        |         |         |
|----------------------------|--------|---------|---------|
| 4-6 ft., 1 and 2 year..... | \$0.30 | \$ 2.50 | \$16.00 |
| 3-4 ft., 1 and 2 year..... | .20    | 1.80    | 12.00   |

The sorts listed in heavy type have been tested and proved favorable to this locality.

**Arkansaw Black, Arkansaw Beauty, Baldwin, Bismark, Belleflower, \*Delicate, Early Harvest, Fall Pippin, Gravenstein, Jonathan, New Garden, King David, Maiden Blush, Missouri Pippin, Newtown Pippin, Red Astrachan, Red June, Rhode Island Greening, Rome Beauty, Roxbury Russett, Snow or Fameuse, Spitzenberg, Twenty Ounce Pippin, Winesap, Staymay's Winesap, White Winter Pearmain, Winter Banana, Yellow Transparent, York Imperial, and Seedless.**

\*Delicate is the same apple sold under a similar trade mark name.

### CRAB APPLES (Standard 1 and 2 year).

|              |     |      |       |
|--------------|-----|------|-------|
| 4-6 ft. .... | .35 | 2.50 | 20.00 |
| 3-4 ft. .... | .25 | 2.00 | 18.00 |

Florence, Gen. Grant, Hyslop, Red Siberian, Transcendent, Whitney.

### DWARF APPLES (Grown on Paradise stock root. 1 and 2 year).

|                             |     |      |       |
|-----------------------------|-----|------|-------|
| 4-6 ft. ....                | .40 | 3.50 | 25.00 |
| 3-4 ft. ....                | .35 | 3.00 | 20.00 |
| 4-6 ft., 5 gallon cans..... | .60 | 5.00 | ..... |
| 3-4 ft., 1 gallon cans..... | .50 | 4.00 | ..... |

Dwarf apples bear heavier and earlier than the standards. We recommend them to the small grower with limited space. Stock in cans may be had all summer for late planting.

**Bismark, Banana, Delicate, Fall Pippin, Maiden Blush, Twenty Ounce Pippin.**

### APRICOTS (On peach and apricot roots. 1 year).

|              |     |      |       |
|--------------|-----|------|-------|
| 4-6 ft. .... | .40 | 3.50 | 22.00 |
| 3-4 ft. .... | .30 | 2.50 | 18.00 |

Blenheim, Hemskirk, Moorpark, Newcastle, Pringle, Royal, Tilton.

### CHERRIES (1 and 2 year).

|              |     |      |       |
|--------------|-----|------|-------|
| 6 ft. ....   | .40 | 3.50 | 25.00 |
| 4-6 ft. .... | .35 | 3.00 | 20.00 |
| 3-4 ft. .... | .25 | 2.00 | 15.00 |

Bing, Black Republican, Black Tartarian, Early Richmond, May Duke, Morello, Montmorency, Royal Ann (Napoleon Bigarreau). Sour cherries, especially Morello, do well in this locality.

**BURBANK'S NEW CHERRY.**

"ABUNDANCE."

|               |     |       |       |
|---------------|-----|-------|-------|
| 4-6 ft. ....  | .75 | ..... | ..... |
| Smaller ..... | .50 | ..... | ..... |

### FIGS (1 year).

Each 10 100

|            |     |      |       |
|------------|-----|------|-------|
| 6 ft. .... | .60 | 5.00 | 40.00 |
| 5 ft. .... | .50 | 4.00 | 30.00 |
| 4 ft. .... | .35 | 3.00 | 25.00 |
| 3 ft. .... | .25 | 2.00 | 18.00 |
| 2 ft. .... | .20 | 1.50 | 12.00 |

**BLACK:—Brunswick, Black San Pedro, Celeste, Mission or California Black.**

**WHITE:—Brown Smyrna, Calimyrna, Kadota (same as White Pacific), Rose Blanche, Verdal Longue, White Adriatic, White Pacific, White San Pedro, White Smyrna and Capri.**

The Calimyrna will not bear unless fertilized with pollen from the Capri by means of the fig wasp. The Smyrna we list does not require pollination.

We have some 2 year figs, all varieties, small stock and somewhat crooked, but much hardier than the young stock and will not freeze. Price one-half of the regular grades of the same sizes.

### MULBERRY.

**Black Spanish (Noir de Spain).**

|              |      |      |       |

## Deciduous Shrubs—Foliage and Berries

**ACER palmatum** (Japanese Maple).

## VARIETIES:

**PURPLE LEAF**                      **BLOOD LEAF**  
**GOLDEN LEAF**                      **VARIEGATED**

Pots or cans: 16-20 in., .50 to .75; 24-30 in., .75 to 1.25; 36-48 in., 1.25 to 2.50

See Deciduous Trees.

**ARALIA.**
*pentaphylla* (Five Leaved).

Cans: 12-24 in. .25

*spinosa* (Hercules Club, Thorny Aralia).

 Cans: 1-3 ft., .25; 3-4 ft., .40 to .50;  
 5-8 ft., .75 to 1.50

See Evergreen Shrubs.

**ARTEMESIA abrotanum** (Southern Wood—Old Man).

Pots or cans: 8-15 in. .15 to .25

**BENZOIN odiferum** (*Laurus benzoin*).

Open root: 12-30 in., .25; cans. .35

**BERBERIS—BARBERRY.**
*communis*. See *vulgaris*.

*Hookeri compacta*.

Cans 3 ft. .50

*Japonica flora lutea* (New Yellow Flowered).

Cans: 2-4 ft. .35 to .50

*purpurea* (Purple).

Open root: 2-3 ft., .25; 3-4 ft. .40

Cans: 2-3 ft., .40; 3-4 ft. .50 to .60

*Thunbergii* (Japanese).

Open root: 6-12 in., .15; 12-18 in., .20; 18-24 in., .30

Cans: 6-12 in., .20; 12-18 in., .30; 18-24 in., .45

*virescens*.

Cans: 24 in. .35

*vulgaris* (Common).

Open root: 3-4 ft., .25; cans. .35

*v. atropurpurea* (Purple Leaf).

Open root: 18-24 in., .25; 24-36 in., .35; 36-48 in., .45

Cans: 18-24 in., .35; 24-36 in., .50; 36-48 in., .60

**CLERODENDRON Fargesii**.

 Pots, balls and cans: 8-16 in., .25;  
 20-36 in. .50 to .75

**CORNUS Siberica** (Variegated Dogwood).

Open root: 12-18 in., .35; cans. .45

**COTONEASTER.**
*Sinensis* (Chinese).

Open root: 24-30 in., .25; 36-40 in. .30

Cans or balls: 24-30 in., .35; 36-40 in. .40

**ELEAGNUS.**
*longipes* and *edulis*.

Open root: 2-3 ft., .30; 3-4 ft. .40

Cans: 2-3 ft., .40; 3-4 ft. .50 to .60

**EUONYMUS.**
*Americana* (Strawberry Tree).

Open root: 15-20 in., .20; 24-30 in., .25; 36-40 in., .40

Cans: 15-20 in., .25; 24-30 in., .35; 36-40 in., .50

*atropurpurea* (Burning Bush).

Open root: 24-48 in., .40; cans. .40 to .60

*Europeus* (Spindle Tree).

 Open root: 18-24 in., .25; 30-36 in., .35;  
 40-60 in. .50 to .60

 Cans: 18-24 in., .30; 30-36 in., .45;  
 40-60 in. .75 to 1.00

**LAURUS benzoin**. See *Benzoin odiferum*.

See also Evergreen Shrubs.

**LEMON VERBENA.**

 Pots or cans: 10-15 in., .15; 16-20 in., .25;  
 24-30 in. .35

## SUPERCEDED VARIETIES

There are a number of roses grown and sold which do not succeed well in this climate, and whose place has been taken by other improved varieties of the same type and color. We aim to keep up our list to date and handle only those that we know will give satisfaction, and after this year, do not expect to grow the following varieties, and where we have a surplus will make a special low price to dispose of them. The reasons for discontinuing and the names of better substitutes are as follows:

## Names

Augustine Guinnoisseau—Seldom perfect, poor grower  
 Bride—Almost identical but not as good as  
 Bridesmaid—Almost identical but not as good as  
 Blue Rambler—Poor color  
 Buttercup—Poor bloomer  
 Cath. Mermet—Similar but not as good as  
 Capt. Christy—Fades in hot weather, poor bloomer  
 Cl. Malmaison—Poor bloomer  
 Cl. Devoniensis—Poor bloomer  
 Crimson Rambler—Mildews  
 Dorothy Perkins—Mildews  
 Duchess of Albany—Seldom perfect, poor grower  
 Duchess de Brabant—Small, does not cut or last  
 Empress of China—Poor form and bloomer  
 Flower of Fairfield—Poor bloomer  
 Gardenia—Poor bloomer  
 Gen. Jacquiminot—Poor bloomer.

Helen Gould—Poor stem and color, mildews

Homer—Small, seldom perfect

Johnnes Wesselhoft—Small, single

Laurette—Small, not distinctly colored

Leuchtfleur—Not as good as

Magna Charta—Short season

Meteor—Buds blight

Mrs. Robert Garrett—Fades badly, weak stems

Mrs. Taft—Not as good a polyanthema as

Red La France—Seldom perfect, poor grower

Safrano—Single, does not last

White La France—Seldom perfect, fades,, poor grower

## CORK OAK

(*Quercus Suber*)

HOW much money would you take for that tree if it stood on your ground?

The Best

STREET TREE  
LAWN TREE  
SHADE TREE IN CALIFORNIA

STANDS Heat, Cold, Drought and Wet

The tree pictured here is twenty years old and forty feet high

*Not so slow after all*

Remember—When you plant an oak you are planting for yourself and for your grandchildren.

(See page 24)
